LIST OF PLATES (Map of United States Soils - Plate 1)	Pocket
AIRPHOTO ANALYSIS CHARTS	Pocket
AIRPHOTOS (Plates 2 to 63)	APPENDIX B, ALBUM
 Chapter	
I INTRODUCTION	1
II NOTES ON GEOLOGY AND PEDOLOGY	5
III RESIDUAL SOILS	20
Limestones, Including Dolomitic and Cherty Limestones	20
Sandstones and Sandstones and Shales	22
Shales and Sandstones	24
Shales	24
Sandstones, Limestones, and Shales	26
Limestones and Shales	26
Limestones and Sandstones	28
Red Bed Shales and Sandstones	28
Sandstones and Shales with Lava, Tuffs, and Diatomaceous and Micaceous Shales	29
Shales, Clays, Sandstones, Limestones, and Scoria	29
Sandstones, Sandy and Clayey Shales, and Clays	30
Metamorphic and Intrusive Rocks	31
Extrusive Rocks - Basalt and Lava	32
IV LOESSIAL SOILS	34
V GLACIAL MATERIALS	41
Old Drift	42
Young Drift	44
VI WATERLAID MATERIALS	52
Soils of the Coastal Plain	52
Soils of Filled Valleys and Great Plains Outwash Mantle	57
Great Plains Outwash Mantle	57
Filled Valleys	60
Valley Fill - Unconsolidated	61
Valley Fill - Consolidated in Places	65
Valley Fill - Semi-Consolidated	66
Recent Alluvium	67
VII NON-SOIL AREAS	72
VIII THE PRINCIPALS OF AIRPHOTO INTERPRETATION	76
IX AIRPHOTO ANALYSIS OF RESIDUAL SOILS	87
Sedimentary Rock	87
Sandstone, Shales, and Limestones (Tilted)	87
Sandstone, Shales, and Limestones (Horizontal)	89
Limestone	91
Shale	92
Metamorphic Rock and Intrusive Rocks	93
Gneiss, Schists and Slates	93
Granites and Related Rocks	95
Extrusive Rocks	96
Basalt and Lava	96
X AIRPHOTO ANALYSIS OF AEOLIAN SOILS	98
Loess and Sand Dunes	98
Loess	98
Sand Dunes	100

Chapter	Page
XI AIRPHOTO ANALYSIS OF GLACIAL MATERIALS	102
Moraines	102
Till Plains	104
Kames and Eskers	105
Drumlins	106
Outwash Plains	107
Lacustrine	108
Muck and Peat	109
Terraces	110
XII AIRPHOTO ANALYSIS OF WATERLAID MATERIALS	112
Soils of the Coastal Plain	112
Soils of the Filled Valleys and Great Plains	
Outwash Mantle	115
Great Plains Outwash Mantle	115
Recent Alluvium	118
XIII APPLICATION OF THE DATA TO AIRPORT DEVELOPMENT	121
APPENDIX A	138

FIGURE INDEX

Figure	Page
1. Broken Lava Beds in Western New Mexico	8
2. Cinder Cone in Central Arizona	8
3. Chain of Subdued Mountains of Pre-Cambrian Origin in the Western United States	9
4. Exposure of Cambrian Sandstones in the Driftless Region of Wisconsin	9
5. Outcrop of Limey Chert in the Arbuckle Mountains of Southern Oklahoma	12
6. Outcrops of Minor Intrusion in the Connecticut Valley	13
7. Highly Dissected Triassic "Red Beds" in the Painted Desert of Arizona	13
8. Dissected Granite of the Idaho Batholith	15
9. Braided Stream Channel Cut in the Eocene Rocks of the Northern Great Plains Region	15
10. Physical Features Associated With the Tertiary Formations of the Northern Great Plains in the Wyoming Basin	16
11. Deep Deposits of Loess in Eastern Nebraska	16
12. System of Outwash Terraces Near the Shoshone River in Wyoming	17
13. Exposed Soil Profile in Glacial Drift	18
14. Profile of a Residual Soil Illustrating the Erosion of the Plastic Silty-Clay B Horizon	18
15. Flexible Pavement Located on Soils Derived from the Limestones of the Kaibab Plateau in Arizona	21
16. Sinkhole in Mississippian Limestones of Southern Indiana	21
17. Pumping Rigid Pavement Situated on Limestone Soil	22
18. Topography Associated With Residual Soils Originating from Pennsylvanian Sandstones in Eastern Oklahoma	23
19. Topography Characteristic of that Part of the Driftless Region in Wisconsin Where Cambrian Sandstones are Exposed	24
20. Level to Gently Undulating Topography Representative of Soils Derived from Cherokee (Pennsylvanian) Shale	25
21. Land Features Associated with the Soils Weathered from Pierre Shale in South Dakota	26

22. Residual Soils Which Originated from Clay Shales in the Arid Regions of the Southern Great Plains	26
23. Pumping Pavement Located in a Section of Oklahoma where Soils have been Derived from Sandstones, Limestones, and Shales	27
24. Outcrops of Ordovician Limestone and Shale in a Stream Channel in Southeastern Indiana	27
25. Tertiary Valley Fill and Massive Sandstone Outcrops Bordering a Stream Channel in Central New Mexico	30
26. Relief Typical of the Big Badlands in South Dakota	30
27. Exposure of Mica Schist and Overlying Louisa Soil	31
28. Lava Beds with Relatively Shallow Soil Overburden in Central New Mexico	32
29. An Area of Basaltic Residual Soil in Western United States	32
30. Topography and Vegetation Usually Attendant to Loess Deposits in the Eastern Portion of the Great Plains	35
31. Rolling Topography Representative of the Palouse Soils in the Northwest	38
32. Vertical Slopes in a Cut Through Loess in Southern Mississippi	39
33. An Esker in the Till Plains of Central Ohio	42
34. Level Upland with a Mantle of Old Drift	43
35. Topography Typical of the Till Covered Portions in the Seaboard Section of New England	44
36. Terraces in the Connecticut Valley	45
37. View of an Airport Site in the Superior Upland During Grading Operations	46
38. Topography and Vegetative Cover Peculiar to the Great Lakes Section of Young Drift	47
39. An Oblique View of an Airport Located on Sandy Glacial Outwash in Minnesota	47
40. Till Plains of Northern Indiana	48
41. Conditions Prevailing in a Boulder Belt of the Young Drift	48
42. Morainic Topography in Northern Iowa and Southern Minnesota	49
43. Gravel Pit Opened in a Glacial Terrace	49
44. A Lacustrine Plain in Northwestern Ohio	51
45. Granular Glacial Drift in a Valley in Western Washington	51
46. Topography and Vegetation Typical of the Terraces in Positions Somewhat Removed from the Atlantic and Gulf Coasts	53
47. Timber Belt Located on Silty Soils in Alabama	54
48. Vertical Banks in a Major Gully Eroded in Sandy Soils of the Inner Coastal Plain	55
49. Level Ground Surface in the Black Belt of Eastern Texas	56
50. An Illustration of the Performance of Pavements Underlain by Clay Soils Near the Gulf Coast	56
51. Topography and Vegetation Typical of the Northern Great Plains in the Vicinity of the Black Hills	58
52. Rigid Pavement, Located on the High Plains Mantle, Showing Poor Performance	58
53. Pavement Underlain by Soils Derived from Black Shale in the Colorado Piedmont	60
54. Outwash Gravels in the Great Plains Portion of South Dakota	61
55. Lacustrine Deposits, Granular Terraces, and Mountains Near Great Salt Lake	61

Figure	Page
56. An Example of Wind Erosion in a Filled Valley in the West	62
57. Unconsolidated Materials Deposited in an Elongated Valley and Now Exposed by a Deep Highway Cut.	64
58. Filled Valley of Limited Extent in New Mexico	65
59. Granular Valley Fill Deposited in the Form of an Alluvial Fan	66
60. Broad Alluvial Plains, at the Base of a Limestone Escarpment, in the Missouri River Valley	67
61. Youthful Stream Valley in Idaho	69
62. Glacial Gravel in a Terrace in South Dakota	70
63. An Alluvial Fan and Terraces at the Foot of a Mountain Range in the Great Basin of Utah	71
64. Bedrock Exposure and Shallow Soil Mantle in West Virginia, Illustrating a Limited Non-Soil Location	73
65. Canyon of the Little Colorado River, Arizona	75
66. Volcanic Cones in the Southwest	76
67. Drainage Pattern Occurring in Roane County, Tennessee	78
68. The Weathering of Clays Produces "Soft Slopes"	79
69. A Typical Gully Type Found in Arid Regions	81
70. Sketches Showing Characteristics of Gullies in Granular Soils	81
71. Characteristics of Gullies in Plastic, Fine-Grained Soils	81
72. This Type of Gully is Found in Deep Uniform Deposits of Plastic Silty-Clay Soils	82
73. A V-Shaped Gully	82
74. A Broad Gully With Eroded Flanks and a Rill Channel	83
75. Vegetative Forms Occurring in Wet Areas	85
76. "Dead Furrows".	85
77. The Simple V-Shaped Gully	88
78. Two Views of Sinkholes Occurring in Limestone Regions	90
79. Steeply Dipping, Thin Bedded Dolomitic Limestone in the Arbuckle Mountains	92
80. A Young Gully in Friable Sandy Soils	94
81. A Highway Cut Exposes the Typical Cross-Section of a Barchane Dune	100
82. A Typical Scene in the Black Belt Area	113
83. Engineering Soil Map	126
84. Representative Soil Profiles	127
85. Engineering Soil Map	134
86. Representative Soil Profiles	135

TABLE INDEX

Table	
I. Geologic Time Divisions	11
II. Tabulation of Soils in the Palouse Region With Average Values of Rainfall and Elevation	36
III. Construction Costs of Forty Airports	122
IV. Soil and Material Classification	124
V. Comparison of Paving and Drainage Costs for Two Airport Sites	132
VI. Results of Classification Tests on Residual Soils . . Appendix A,	138
VII. Results of Classification Tests on Loessial Soils	146
VIII. Results of Classification Tests on Glacial Soils	148
IX. Results of Classification Tests on Soils of the Coastal Plain	155
X. Results of Classification Tests on Soils of the Filled Valleys and Great Plains Outwash Mantle	158
XI. Results of Classification Tests on Recent Alluvium	163
XII. Summary of Data Derived from Laboratory Classification Tests	166
BIBLIOGRAPHY	167
